About

Easily obtain an accurate, comprehensive cell signal scan with the Cellular Network Scanner 5G from WilsonPro. Designed for the future of 5G, the scanner quickly identifies nearby towers, different local carrier networks, and the strength and quality of different frequencies. The scanner detects and analyzes low band frequencies and frequencies of C-Band and CBRS signals using either LTE or 5GNR modulation. Use the scanner to optimize the design and installation of a cellular repeater solution, from the planning phase to testing the completed system.

For ease of use, the scanner pairs with the Cell LinQ app from WilsonPro for simple access to your data. The scanner stores the data in the cloud, with options for exporting into an excel file.
