Cel-Fi GO X uses Nextivity’s award-winning, network-safe Cel-Fi Smart Signal Booster technology to dramatically improve voice and data coverage in up to two (2) bands for 3G, 4G, and LTE. It is designed to improve indoor and outdoor cellular coverage when one bar is available outdoors, by allowing an antenna to be used to improve indoor cellular performance. Cel-Fi GO X is cost efficient and easy-to-deploy by an installer, and can be easily optimized and monitored by the Cel-Fi WAVE platform.

**Benefits:**

- **Superior Performance:** 100dB Max Gain
- **NEMA 4 Rated**
- **Multi-carrier Support with Carrier Switching app**
- **Carrier Approved for 3G/4G/LTE for Voice and Data**
- **Unconditionally Network Safe**
- **SMA Antenna Connectors**
- **Cel-Fi WAVE Management Platform**

### Wireless Features

- 3G/4G/LTE support (WCDMA / HSPA+ / LTE)
- Supports two (2) bands simultaneously from a single operator
- FDD
- Up to 100dB system gain, per band
- Peaceful coexistence with adjacent Wi-Fi (2.4 GHz & 5 GHz), femtocells, and cellular devices
- Advanced digital echo-cancellation (>30dB) and channel select filtering algorithms
- Automatic Gain Control (AGC) based on fast real-time echo-cancellation
- Linear RF front end
- Adaptive signal equalization
- Uses Nextivity’s 3rd-generation “ARES” chipset

### System Features

- SMA connectors for Donor and Server antennas
- NEMA 4 rated enclosure and connectors
- Support for BIAS-TEE power through Server port
- Glanceable LED User Interface (UI)
- Supporting smart phone application (Cel-Fi WAVE)
- Convection cooled cast aluminum chassis
- Easy mounting capability
- Mounting screws and anchors included

### Mobile Network and Network Protection Features

- Global band combinations available
- Systems are pre-configured for a single carrier (network operator)
- Supports multiple channels with bandwidths of 5/10/15/20 MHz per channel
- Works with any user equipment (UE) on the configured network (no whitelist/blacklist)
- Up to 40 MHz system relay bandwidth
- Support for 3GPP Release 10 features
- Provider-specific system: Cel-Fi distributes and boosts service only for the Operator PLMNIDs for which the device is authorized and configured
- Secure and ciphered provisioning
- System intelligence accurately establishes proper safe uplink power in real time
- Uplink Muting Mode automatically shuts down uplink cellular transmissions when no active user equipment is detected
- System shuts down upon Operator’s network command or failure detection

### Wireless Benefits

- Clear and reliable cellular connections within coverage area up to 15,000 ft² (1,400 m²) per system
- Highest gain (100dB) provides best coverage footprint
- Advanced Echo-Cancelation allows Cel-Fi to transmit more power without feedback interference
- Subscriber devices (UE) require less transmit power for improved battery life
- Linearity eliminates IMD desense issues
- Dynamic gain control ensures maximum gain – best coverage – at all times in ever changing RF environments, without user intervention
- Nextivity purpose-built, high-performance, six core ASIC processor, provides best performance at lowest cost
**System Benefits**
- Distribute and boost cellular coverage
- 3G and 4G support, Voice and Data, network safe
- LED cues provide visual feedback for ease of setup and status
- Works with any subscriber device from the configured Operator

**Mobile Network Benefits**
- Flexibly deploy on LTE, VoLTE, LTE-Advanced, and WCDMA networks, with multiple cellular bands, simultaneously
- Automatically adjusts channel bandwidths between 5 MHz and 20 MHz
- UE control is transparent and remains centralized in the network core (no gateways or third-party software)

**Compliance**
- 3GPP TS 25.143 Rel.10
- 3GPP TS 36.143 Rel.10
- FCC Part 15, 20, 22, 24, 27
- ISED (Industre Canada)
- Bluetooth BQB
- CE

**System Management (Software)**
- Supported by Cel-Fi WAVE cloud portal
- Cel-Fi WAVE Portal capability:
  - Status (List and Map)
  - Commissioning
  - Diagnostics
  - Software Updates
  - Settings
  - Reporting
  - Alarms & Notifications

**Antenna Ports (Donor and Server)**
- Impedance: 50 Ohm
- Return Loss: 8 dB
- Output Protection

**Environmental**
- Operating temperature: 0° to 65° C
- Convection Cooling
- Relative humidity: 0% to 95%, noncondensing
- RoHS 2 (European and China compliant)
- WEEE
- NEMA 4
- Surface Temp at any point (30° ambient): 53° C

**Dimensions**

**Power**
- 9.6 – 16.5V
- 2A current draw
- 16W nominal power consumption

**Installation**
- Mounting hardware included

**DC Power Plug and Jack**
- NEMA 4 rated power plugs and jack

**Radio Performance**
- The Cel-Fi GO system can boost up to two (2) bands concurrently. Either profile can be selected:
  A) One (1) High band boost and one (1) low band boost or B) Two (2) high bands boost

**Band Variations:**
- (check product version for specific band support)
