Side-Exit Adapter

MOUNTING THE HEX 360

The mounting bracket can be directly secured to the exterior fascia of the structure. For best performance, the Hex 360 outside antenna should be mounted above the horizontal plane of the structure and vertically. Mounting the Hex 360 horizontally or at an angle will

degrade performance. The side-exit adapter can be used to route the cable behind the bracket, if needed.

NOTE: Additional fasteners/screws to be determined by installer and material of structure.
