**Package Contents**

- Drive 4G-X Signal Booster
- Mini-Mag Mount Antenna
- Slim Low Profile Antenna
- DC Power Supply
- Mounting Bracket

---

This is a CONSUMER device.

**BEFORE USE, you MUST REGISTER THIS DEVICE with your wireless provider and have your provider’s consent. Most wireless providers consent to the use of signal boosters. Some providers may not consent to the use of this device on their network. If you are unsure, contact your provider. In Canada, BEFORE USE you must meet all requirements set out in ISED CPC-2-1-05. You MUST operate this device with approved antennas and cables as specified by the manufacturer. Antennas MUST be installed at least 20 cm (8 inches) from (i.e., MUST NOT be installed within 20 cm of) any person. You MUST cease operating this device immediately if requested by the FCC (or ISED in Canada) or licensed wireless service provider. WARNING: E911 location information may not be provided or may be inaccurate for calls served by using this device.**
1 Outside Antenna Installation

Select a location on top of the vehicle to mount the Mini-Mag Mount Antenna that is:

- Near the center of the vehicle’s roof.
- Free of obstructions.
- At least 12 inches from any other antennas.

2 Running Antenna Cable

Run the Outside Antenna cable into the car. The cable is strong enough that it may be shut in most vehicle doors without damaging the cable. For a cleaner look, carefully pull down the door seal, run the cable under the seal, and push the seal back into place. This method reduces wear on the cable as the door opens and closes.

3 Inside Antenna Installation

Identify a place to mount the 4G In-Vehicle Antenna. Either on the side on seat or dash. The location should be at least 18 inches but no more than 36 inches from where the cellular device will be used. Use the Velcro® adhesive strip/adhesive strip provided and attach to desired location.

4 Connect Coax Cables to Drive 4G-X

Select a location for the Drive 4G-X that is free from excessive heat, direct sunlight and moisture and that has proper ventilation. Good locations include underneath a seat or under the dashboard. Connect the cable from the Mini-Mag Mount Antenna to the port labeled “Outside Antenna” on the Drive 4G-X and connect the cable from the 4G In-Vehicle Antenna to the port labeled “Inside Antenna” on the booster.

5 Connect Power Supply to Drive 4G-X

Connect the power supply cord to the end of the Drive 4G-X labeled “Power.” NOTE: Do NOT connect the power to the Signal Booster until you have connected both the Inside and Outside Antennas.

6 Connect to Power Supply

Plug the power adapter into vehicle’s 12V DC power supply. Power up your Drive 4G-X by flipping the switch on the back of the DC power adapter on. If your Drive 4G-X is working correctly, the light will be green.

NOTE: If light is not green on your weBoost booster, please refer to the full user guide online or contact customer support at 1-866-294-1660 or go to support@weboost.com.
