WILSONPRO™

INTRODUCING
WILSONPRO CLOUD

The industry's first platform for **cloud-based management & monitoring** of cellular signal amplifiers.

The WilsonPro Cloud allows an integrator to manage and monitor installed cellular amplifiers from a phone, tablet, laptop, or any device that runs a Web browser. You can get customizable email and text notifications to alert you to any status change of your installed amplifiers, including notification if a system ever goes offline.

With the WilsonPro Cloud you can remotely reset an amp or selectively turn specific frequency bands on and off, so the integrator avoids costly troubleshooting site visits. The platform also provides report generation, performance and signal level histories, and organization of monitored amps by account and location. There's even a remote Donor (outside) antenna tuning tool.

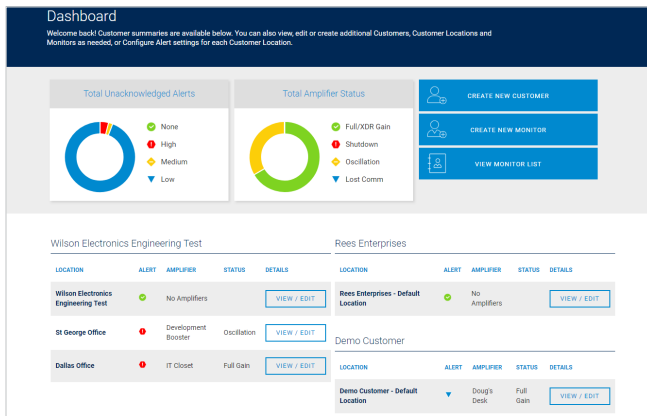

LTE
INCLUDED

The wireless LTE connection is included in the annual WilsonPro Cloud subscription.

No additional Internet connection is required
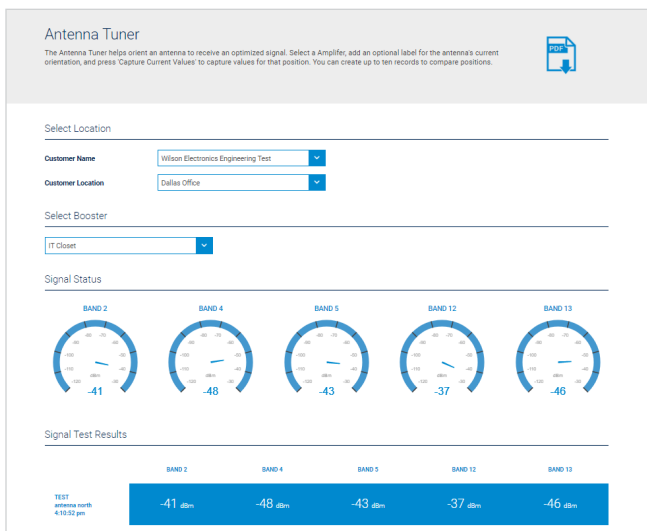

Pro 1000C Key Features

- Remotely reset an amp or turn specific frequency bands on & off
- Generate reports & view performance histories on your phone
- Organize monitored amps by account and location
- Remote donor antenna tuning tool
- Included 1-year WilsonPro Cloud service subscription
- Covers up to 35,000 sq ft with enhanced 4G LTE & 3G signal
- +15 dB max downlink power for expanded indoor coverage
- Includes XDR - won't shut down due to overpowering tower signal
- Full color display for easy system set up
- Works with all U.S. cellular networks

WilsonPro Cloud Dashboard shows ALL of your customers, organized by location and amplifier.

Performance graphs assist with remote troubleshooting.

Donor (outside) antenna tool reduces installation time.
